Re: Haitian Rebellions 2018

In light of the violent looting and the upheaval of the Haitian people who, for far too long, have been subject to constant abuse and oppression of the ruling elite; the dominant and decadent ruling class continues to collude with the International Monetary Fund (IMF) with little to no consideration for the impact it will have on the masses of the population. Subsequently, the people of Haiti have responded. The brazen and shameless step recently taken by the self-indulgent elites to raise fuel prices has only served to be the proverbial straw that broke the camel's back.

We applaud the people of Haiti and join them as they scream that, 'Enough is enough!' The oppressive oligarchs who continue to plunder and steal the rich heritage of a courageous nation, have only provoked an upsurge from below. The power they long to maintain and continue to abuse has only resulted in creating power from below. In both parts of the island, the people have come together to tell the voracious oligarchs that they will not tolerate their abuse any further.

We, the Caribbean People, applaud the courageous people of Haiti. Haiti will not be another territory filled with intolerance, exploitation and the destruction of people. The Trinbagonian arm of the Assembly of Caribbean People denounces this perverse attempt to plunge our brothers and sisters into extreme misery. We join them in the struggle against the thieves and predators of the riches of their beautiful island built on the backs of the courageous Haitian people.

The Trinbagonian arm of the Assembly of Caribbean People refuses to remain silent while the history of a strong and courageous country is rewritten and dishonoured. We stand united with the Haitian people in this struggle during these unfortunate times and we salute you Haiti for standing up and speaking truth to the corrupt elites.

In solidarity,

Comradely,

Kandis Sebro
